TACENS

OVUM

VIBRATION SPEAKER

The new generation vibrational TACENS speaker is designed to amaze and enjoy music anywhere. This new next-generation vibrational driver is able to create a unique, rich sound over any solid surface.

TACENS Ovum is a small and light gadget that turn any object in speaker. Designed specifically for surfaces and solid objects not too hard or thick like cardboard objects, paper, plastic or objects/surfaces made of thin metal or wood.
Highlights its ability to adhere to any object or surface at any angle, even upside down, giving you the ability to use almost anything. The resonance amplification power is impressive depending of the size and characteristics of the object we use.
It uses the standard headphone jack connector, making it the perfect companion to any audio device that has this connector: netbooks, Pads, mobile phones, MP3, MP4 ... The sound characteristics vary depending on the material and shape of the object or surface you use... the imagination is your limit!.
Ovum TACENS revolutionize the way you hear music.

Recommended for surfaces not too hard or thick (paper, cardboard, plastic, ...)

Specifications:

- Converts almost any object or solid surface in an impressive omni-directional vibration speaker.
- Lightweight and portable works with any standard headphone output device.
- Capable of an incredible sound quality with a high frequency range and powerful bass.
- The vibration of sound waves react on different types of surfaces and objects, creating different sound effects. The more hollow is the object the better resonance and sound you will get.
- Dual Powered by batteries (2xAA) or USB.
- Soft black rubber finish
